## Delta launches latest Damp Proofing Brochure – Remedial Action and Prevention

We are delighted to announce the launch of our new Damp Proofing Brochure. Put together by Delta's knowledgeable Technical Team, our latest edition covers the joining of materials in a matter that retains the integrity of a structure whilst assigning a system which offers functional compatibility and long-term value.

Delta's latest brochure is a welcomed addition to our already extensive library, offering a wide range of topics which cover both remedial and preventative solutions available.

Delta's Damp Proofing brochure summarizes key messages for homeowners, architects, specifiers, developers and contractors offering solutions to prevent and reduce dampness in structures and ways to remove damp and mould once it occurs.

This 40-page document has been artistically designed simply and effectively to guide you through from design philosophies to remedies available.

When specified with the correct systems, all types of installations are possible - creating innovative and effective solutions is our speciality.

### Download today!

Delta's Brochures offer a lot of information for their size! Don't just

take it from us, visit our website to see for yourself - <https://www.deltamembranes.com/technical/delta-brochures/>. All our brochures are free to download with hard copies available.
